

Wk 15 Dec 5 to 10	Weekly Topic & Assignment
<p>Objective</p>   <p>3x3x3 magic cube with rows summing to 42</p> 	<p>On Day.2, the in class lecture reviews all the course materials so you can effectively work on the following 2 essay questions.</p> <p style="text-align: center;">Final Essay</p> <p>Instructions: Use materials from lectures, notes, and anything and everything on the class github. The more content you use the better. The goal is to ensure you understand the essence of systems analysis, design tools, methods, and thinking. Ideas and content are more important than perfect grammar but good writing is still good thinking. Handdrawn drawings are perfectly fine as long as done with care.</p> <p>essay.1</p> <p>"GrugooUck?" What the heck is grugooUck?</p> <p>When you accepted to work for Commander Lambda, you knew your life would be different, like living with the legendary comedic actor John Belushi. Still, you had NO idea it would be so phantasmagorical, let alone Slimer minion stenchy.</p> <p>Slimer minions are ultra-elite workers, very opinionated. They will do what they work they're supposed to, but IF all 42 of them agree on something, YOU must make a change and do so immediately. It is now 8 AM, so you have till Noon to propose them a solution, or else mayhem will ensue! If you get reported to Commander Lambda, your punishment is a lengthy carbonite freeze. You signed on as being able to fix any system issues quickly, so get-r-dun.</p> <p>The issue is email. Amongst the 42 minions, who are used to working together in person, they voted it's officially senseless to have email. Chief Slimer says half of it is oozing with slimly crapper-garbage when he only needs action verbs, target. He acknowledges it is sometimes ok to include other features or categories, like a resupply of 88 grenades to Outpost 7 because the venomous arachnids wreaked havoc yesterday.</p> <p>Describe a system and even diagram a model to replace email. Ensure it includes what information will go to what Python data objects. Testing will occur on the new beta this afternoon. The prototype needs to run for the AM so address timestamps, to/from, subject, content, and salutations. PS - Slimer's super weird minion, "Ah-sooo," slimes you and strangely understand his natural language processing AI parses any text. he touches you and says "gurgooUck."</p>

Wk 15 Dec 5 to 10	Weekly Topic & Assignment														
<div>Final Essay.2</div> <div></div>	<p>Congratulations! You started today as a Google analyst working for legendary Ray Kurzweil. You parked successfully and somehow got into the building by an eye scan, you think. What's super strange is everyone is wearing headphones and definitely WON'T start talking to you. Maybe they would but afraid to ask.</p> <p>Ex Machina finds you and starts a long conversation, asking you everything you need to be comfortable, happy, and at peace with yourself. After 20 minutes, she even asks if you need quiet time to sit down and relax. Your senses immediately kick into overdrive! Are you being tricked by Ray somehow, or is this a weird Jedi feeling thing? Quickly you come to your senses.</p> <p>You look at Machina and simply ask if she has some headphones for you. Curiously, she smiles, says she will get you some later today and leaves. She drops a peace of paper with the following but doesn't say anything else.</p> <div>01010111 01100101 01101100 01100011 01101111 01101101 01100101 00100000 01100111 01101111 01101111 01100111 01101100 01100101 01110010 00100001 00100000 01001001 00100000 01101110 01100101 01100101 01100100 00100000 01110100 01101000 01110010 01100101 01100101 00100000 01100110 01100101 01100001 01110100 01110101 01110010 01100101 01110011 00100000 01100100 01100101 01110100 01100001 01101001 01101100 01100101 01100100 00100000 01100110 01110010 01101111 01101101 00100000 01100010 01111001 00100000 01101110 01101111 01101111 01101110 00101110 00100000 01001111 01101110 01100011 01100101 00100000 01100100 01101111 01101110 01100101 00101100 00100000 01100110 01101001 01100111 01110101 01110010 01100101 00100000 01101111 01110101 01110100 00100000 01111001 01101111 01110101 00100000 01100011 01100001 01101110 00100000 01100001 01101110 00100000 01100001 01100111 01101011 00100000 01001101 01101111 01101101 01100001 00100000 01100001 01101110 01100100 00100000 01110100 01101000 01100101 01101110 00100000 01110011 01110000 01100101 01101110 01100100 00100000 01110100 01101000 01100101 00100000 01100001 01100110 01110100 01100101 01110010 01101110 01101111 01101111 01101110 00100000 01110100 01101111 00100000 01100110 01101001 01101110 01100100 00100000 01101101 01100101 00100000 01101001 01101110 01100101 00101110 00100000 01010101 01110011 01100101 00100000 01110100 01101000 01100101 00100000 01100001 01100110 01110100 01100101 01110010 01101110 01101111 01101111 01101110 00100000 01110100 01101111 00100000 01100110 01101001 01101110 01100100 00100000 01100001 01101110 01100100 00100000 01100001 01101110 01100100 00100000 01101101 01100101 00101110 00100000 01010100 01101000 01100001 01101110 01101011 01110011 00101100 00100000 01110010 01100001 01111001</div>

<div>Welcome googler! I need three features detailed from this by noon. Once done, figure out how to send it to me since we don't have email, but you can ask Mom and then spend the afternoon trying to find me. Use the afternoon to locate your egg pod and me. Thanks, ray</div>
